Delivering a Healthy WA

Graduate Enrolled Nurses at Osborne Park Hospital will be given the opportunity to optimise their personal growth in clinical practice, enabling a smooth transition from student nurse to first year Enrolled Nurse.

Established in 1962, Osborne Park Hospital is a fully accredited 205-bed capacity, community general hospital providing comprehensive specialist health care services for the north metropolitan suburbs.

Vision

To be the centre of excellence for elective surgery and the rehabilitation of the aged, and the recognised clinical model for non-tertiary women's and newborn care for the North Metropolitan Health Service.

Osborne Park Hospital is situated in Osborne Place, Stirling, adjacent to the Mitchell Freeway and Karrinyup Road with free on-site parking and easy access to public transport.

With a modern operating suite, which includes three theatres, two endoscopy units, and a day surgery unit, Osborne Park Hospital offers a variety of clinical experiences.

Its specialist services include: obstetrics and gynaecology, anaesthetics, general surgery, orthopaedics, ophthalmology, urology, gastroenterology, paediatric surgery, ear nose and throat surgery, general medicine and rehabilitation of the aged and extended care.

Clinical placements in mental health (older adult in-patient and adult community) are also available.

These innovative and dynamic areas provide nurses with unlimited opportunities for professional advancement.

To keep staff healthy there is a well-equipped on-site staff gym with personal trainers and class sessions. Gym membership also entitles you to participate in social club activities and promotions.

Every ward has a designated Staff Development Nurse to support newly graduated nurses during their transition from student to practitioner.

Being a graduate gave me time to really polish my skills and improve my competency. I hope to stay at Osborne Park Hospital and keep learning from all the great staff I have met.

Angela, Stirling

As a grad at Osborne Park Hospital I was given all the support I needed to gain confidence in my role as a nurse.

Ben, South Perth
