

## Osborne Park Hospital – Ophthalmology procedure referral

Low-risk day procedures are being performed at Osborne Park Hospital under the Ambulatory Surgery Initiative. Under the ASI specialist fees are bulk-billed to Medicare (the patient has no out-of-pocket expense for the procedure). For a patient to be treated under the ASI referral option (i) a doctor's referral to an individual (named) specialist is required; and (ii) prior to treatment, the patient must elect to be seen as a private (non-admitted) patient.

### OPHTHALMOLOGIST

Mr Edward Mele

### PROCEDURE (please provide details below):

Cataract surgery

### PATIENT DETAILS
