

Osborne Park Hospital – Pain management procedure referral

Low-risk day procedures are being performed at Osborne Park Hospital under the Ambulatory Surgery Initiative. Under the ASI specialist fees are bulk-billed to Medicare (the patient has no out-of-pocket expense for the procedure). For a patient to be treated under the ASI referral option (i) a doctor's referral to an individual (named) specialist is required; and (ii) prior to treatment, the patient must elect to be seen as a private (non-admitted) patient.

PAIN MANAGEMENT SPECIALIST

The first list available for the selected consultant(s) below:

Dr Jenny Morgan

PROCEDURE

- Joint injection
 Nerve block
